

Hiroko Yamaji

Sr. Frontend Engineer · Full-Stack Developer

Dallas, TX | 214-790-1106 | hiroko@hirokoymj.com | www.hirokoymj.com | Green Card

SUMMARY

Frontend & Full-Stack Engineer with 15+ years of experience building scalable web applications. Expert in React, TypeScript, Next.js, and Google Cloud. Recently focused on AI-powered applications using Gemini and AI-agents.

TECHNICAL SKILLS

Frontend: React.js 16/18+, JavaScript (ES6+), TypeScript, Next.js, React Query, Material UI (v4/v6), HTML/CSS
State Management: Redux Toolkit, Context API, Custom Hooks, React Query, GraphQL (Apollo Client),
Authentication: Firebase Auth, Auth0
Testing: React Testing Library, ViTest, Mock Service Worker(MSW), REST APIs
Back-End: Node.js, Express.js, Apollo Server, MongoDB
Database: PostgreSQL, MySQL, MongoDB
APIs: Weather API, Google Maps API, Vehicle API
Cloud/DevOps: GCP (Cloud Run, Cloud SQL, IAM), GitHub Actions(CI/CD, Docker), Vercel
Tools: Git, GitHub, VS Code, Agile (Kanban/Scrum), Figma, Slack, Postman, Vite
AI: OpenAI, LangSmith, Prompt Engineering, Function Calling, Structured Output, RAG
AI Agent: Claude Code (code generation), GitHub Copilot (writing PR description, debugging GitHub Actions)

PORTFOLIO

React & GraphQL Portfolio — AI Weather Chat | www.hirokoymj.com | [GitHub](#)

- **Coding:** React (v19), TypeScript, GraphQL, Context API, Redux toolkit, Custom hooks, Material UI (v6), Auth0
- **Testing:** React Testing Library (RTL), ViTest, MSW
- **Build/DevOps:** Vite, Vercel, GitHub Actions (CI/CD, Docker)

Professional Development & Project

May 2025 – Present

Dallas, TX

- Relocated to the U.S. and actively pursuing software engineering opportunities.
- Built and developed AI-powered web applications using Claude Code and Google Gemini (See the portfolio).
- Earned GitHub Actions Certification; implemented CI/CD pipelines in the production site – hirokoymj.com.
- Strengthening English communication through a customer-facing role in a fast-paced environment.

WORK EXPERIENCE

Infosys Japan | Lead Frontend (React) Developer / Cloud Engineer | Full-Time

Tokyo, Japan

May 2022 – April 2025 | Clients: Google, AXA Insurance

Frontend Development:

- Architected a new React app with the Single Source of Truth principle for state management including Redux and Context for a Digital Transformation (DX) project.
- Built and deployed a React application with Google Sign-In (Firebase Auth) and containerized delivery on Cloud Run, improving deployment scalability.

GCP Technical Consulting (Google Client):

- Deployed web applications on Cloud Run (serverless) and configured auto-scaling for heavy traffic; recommended minimum instance settings to prevent cold starts.
 - Recommended Cloud SQL backup policies and High Availability (HA) configuration for zonal failover recovery.
 - Configured VPC connectivity between serverless apps and Cloud SQL using a private IP only.
 - Troubleshooted customer GCP configurations using Cloud Monitoring and Cloud Logging.
-

Hays Japan | Fullstack Engineer (React + GraphQL) | Contractor

Tokyo, Japan

May 2021 – Jan 2022 | Client: Asurion

- Enhanced and built new features for the Asurion web portal in React, Redux, and GraphQL.
- Tested the React components using Cypress.
- Used *git rebase* to maintain a linear commit history; participated in code reviews.
- Implemented a *Data Source* in the Asurion back-end GraphQL API to fetch data from OpenWeatherMap API.

HyreCar Inc. | Software Engineer (React + GraphQL) | Full-time

Los Angeles, CA

Jan 2019 – Dec 2020 | Ride-hailing startup

- Refactored the HyreCar React app from scratch as the primary Frontend developer.
- Implemented Google Maps API and Vehicle API to identify car locations.
- Conducted code reviews for other developers to ensure architecture consistency and efficient state management.

Beachbody.com | Frontend Engineer | Full-time

Los Angeles, CA

Dec 2017 - Sep 2018

- **Key technologies:** JavaScript, HTML5, CSS3, Sass, JavaScript, Gulp.js, Bootstrap 3, React.js
- Maintained beachbody.com and beachbody-on-demand.com sites as a Frontend Engineer.
- Implemented image carousels and embedded YouTube videos on the Beachbody.com with full-responsive.
- Configured Gulp.js to compile Sass and minify JS files in the local development environment.
- Updated banners and workout videos on a React-based website.

Strategic Partners | Frontend Engineer | Fulltime

Los Angeles, CA

Dec 2016 - Jun 2017

- **Key technologies:** React.js, JavaScript, HTML5, CSS3, Sass, Gulp.js, Bootstrap 3, REST API
- Built a React weather widget using the OpenWeatherMap API and integrated it into an internal site.
- Transformed existing websites from non-responsive to responsive design using Bootstrap 3 grid system.
- Fixed issues in intranet web applications with Angular 1.5 on .Net environment.

Teleflora.com | Frontend Engineer | Fulltime

Los Angeles, CA

Oct 2009 - Oct 2016

- Developed dynamic sweepstakes forms using PHP/MySQL integrated into the e-commerce checkout page.
- Built and maintained responsive landing pages for seasonal campaigns.

JOL Management | Web Developer | Full-time

Los Angeles, CA

Dec 2007 - May 2009

MC Squared | Web Developer | Full-time

Los Angeles, CA

Dec 2006 – Nov 2007

Sony Electronics Inc. | Web Developer | Contractor

Los Angeles, CA

July 2005–July 2006

EDUCATION**Santa Monica College**

Santa Monica, CA

Feb 2004 – July 2005 | Certificate in Interactive Media

CERTIFICATIONS

- | | |
|---|----------------|
| • GitHub Actions Certification | May 2026 |
| • Google Cloud Professional Cloud Developer | September 2024 |
| • Google Cloud Professional Cloud Architect | January 2024 |
| • Google Cloud Professional Database Engineer | July 2023 |

WORK AUTHORIZATION**U.S. Permanent Resident (Green Card)**
